*Please call (916)323-3055 to request reasonable accommodations*

### Scope of the Position:

This position resides in the Technical Support Unit of the Information Systems Division (ISD).

Under the general direction of a Data Processing Manager II, incumbent performs complex systems software work and participates on complex system software project teams, in an OS/390 Enterprise Server environment, located on the State Controller's Office (SCO) LPAR at Teale Data Center.

This position requires strong analytical skills and the ability to manage multiple short- and long-term assignments. Incumbent must be able to demonstrate their ability and willingness to learn and work effectively in an OS/390 environment.

### Duties and Responsibilities:

*Candidates must perform the following essential functions with or without reasonable accommodations*

- Support the installation of vendor-supplied batch, TSO/ISPF and CICS software and utilities in the OS/390 SCO LPAR environment. Perform software evaluations, impact analysis, tailoring, documentation, and testing of new releases. Provide training, user documentation, and technical support for this software to the SCO technical staff.
- Assist SCO technical staff with programming languages, language development/testing/ debugging tools, JCL, and utilities used in batch, TSO/ISPF and CICS environments. Current languages include: COBOL for OS/390, CICS COBOL, REXX, FOCUS, and VISION:Results (DYL). Future support of OS/390 to WindowsNT client/server applications, object-oriented programming, and relational database tools.
- Communicate and work effectively on complex software issues with Teale technical staff, SCO technical management and staff and SCO business management, analysts and staff.

The State Controller's Office is committed to providing equal opportunity to all regardless of race, color, creed, national origin, ancestry, sex, marital status, disability, religious or political affiliation, age, or sexual orientation.

- Support vendor-supplied applications software. Current software includes: ViewDirect, FOCUS, and SAS. Future support of OS/390 to WindowsNT client/server end-to-end applications.
- Support new OS/390 operating system features, including UNIX services, TCO/IP, FTP, client-server, and Web solutions.
- Research and evaluate new vendor software to determine its technical and cost feasibility and usability in the SCO environment.
- Design, develop, test, install, and maintain complex TSO and ISPF applications in support of the SCO technical staff. Components include: REXX EXECs, CLISTs, and ISPF dialog manager.

*Applications will be screened and only the most qualified will be interviewed*

**How to Apply:**

Please submit a STD. 678 State Application and Résumé to:

**State Controller's Office**
